

Chapter 5

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion and gives some suggestions of this study. The result of this study which has already been already discussed in the previous chapter is then concluded. Meanwhile, the researcher also proposed some suggestions related to this study and the result. It is expected that this study to be able to give useful contribution to another researcher who wants to conduct a study in the same field and the teacher who wants to make innovation in the teaching and learning activity.

5.1. Conclusion

Based on the result of the research, which aims to develop the students' writing descriptive text using outdoor activities, the researcher made conclusion related to the research question which are stated in chapter I. The conclusions were obtaining through real phenomenon as the researcher did during the observation. The researcher draws some conclusion as follow:

- 5.1.1 It is proved with the students' improvement score of the tests because mean of post-test in cycle 1 is higher than mean of pre- test (66.17>55.24), the mean of post-test 2 in cycle 2 is higher than mean of post-Test in cycle 1 (70.10>66.17) and the mean of the mean of post-Test of the cycle 3 is higher than post-Test in the cycle 2 (77.31> 70.10). The proven target is 78% or 22 students who increase their writing skill.
- 5.1.2 The significant improvement of using outdoor activities in improving students writing skill is proved from the result of t-test and t-table in cycle 1 (9.30>2.042) which the score of t-test was higher than the score of the pre-test and t-table in cycle 3 (13.69>2.042) also showed that the score of t-test was higher than the score of t- table of the cycle 1 and cycle 2. Here the result of the t-test and the t-table in cycle 2 low (5.13 >2.042)

5.2. Suggestion

5.2.3 To the Researcher

The result of this study can be used an additional reference of further research with different discussion.
