

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the research finding in chapter IV, it was concluded:

- 5.1.1. The use of using Round Robin teaching method to enhance students' vocabulary mastery was more effective than other method. From the result of the two class in this school the researcher get significant. It means that the use of Round Robin teaching method was effective, it can improves students mean score. In pre-test, the students got 52, after giving some treatments, in post-test score the students got 96. It was found that the post-test scores was better than pre-test score.

5.2 Suggestion

Countless gratitude is for Allah for the blessings until I can finish this research. Hopefully, this research may give advantages for others. Therefore, the researcher would like to propose some recommendations to be considered as follows:

- 5.2.1. As the English teachers, they should be more creative and innovative in using method in learning process. Teachers should be able to find interesting method to make students enthusiastic, active and understand more about the material. Such us the use of method in teaching can helps students who have difficulties in learning English. In this research, the teacher can use Round Robin teaching method to enhance students' vocabulary mastery.

5.2.2. This study was expected to give useful information toward the reader about Round Robin teaching method which used to enhance students' vocabulary mastery. It can be used as reference which related to this study. Based on the conclusions above, it was suggested that as the facilitator, tutor, motivator, and dynamisator, English teachers should be active in teaching in learning process. It would be better for English teacher to use Round Robin teaching method to enhance students' vocabulary mastery.
