

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestion of the research related with the discussion before. It determines the finding that was discussed in the chapter four and provides some suggestions toward the next researcher.

5.1 Conclusion

After analyzing the data of speaking materials and the speaking activities on the English course book entitled “Bahasa Inggris” the research finding and discussion, the researcher concludes that is the quality of the speaking material in the course book entitled “Bahasa Inggris” for grade X published by Pusat Kurikulum dan Perbukuan, Balitbang, Kemendikbud is “Good” in which the speaking materials in the course book is relevant with good speaking criteria on the criteria of the good speaking materials table.

The mean and percentages of the result analysis shows that the quality of this book is “Good”. The speaking materials of this book is still relevant and support the teaching learning process. It can helps the students to study and increase their ability especially in speaking. Then most of speaking materials or activities in the textbook are relevant to students’ daily life. As a result, this English course book is good to be used by teachers to teach speaking for grade X.

5.2 Suggestion

Based on the result of the research, the researcher gives some suggestion:

1. For the English teachers

The researcher suggest that English teachers should be more selective in choosing books to be use as a teaching material also creative to find speaking materials that worth for the students to be taught. English teacher still need to add any other materials and activities from other sources to make speaking class more fun.

2. For the students

Speaking is important to understand. The students should be more active to speak English in daily communication. They should be enjoy, active and confident in the speaking class. Do not afraid to share your ideas, do not afraid to do a mistake.

3. For other researcher

This research is far from the perfectness, so for the other researcher should prepare well before and during the research. The researcher also hopes that this research can be used as a reference for the next similar research.

4. For the publisher

Even this English course book is good and appropriate for the students, but the speaking materials in the course book should be more developed. Always search and develop the materials and activities to make better book.

Meanwhile the speaking materials in this English course book are “Good” and suitable with the criteria given, but the researcher has no right to say that the whole course book content is appropriate. There are still

further analysis needed in which is the wise way that the teacher should be evaluate and find the best and relevant learning source before they teach the students.
